

Are you involved in installing or monitoring nest boxes in Victoria?

We aim to:

- understand where and how many nest boxes there are in Victoria
- help evaluate how effective nest boxes are in providing nesting sites for native animals

We are keen to know:

- are you part of a group?
- the location of your nest boxes?
- how many nest boxes you have installed?
- your target species?
- are you collecting data about use of your nest boxes?
- which animals are using them?
